

Counterargument partner (play devil's advocate)

- pick one of the writer's subclaims or rebuttals to other positions
- analyze either the argument supporting the subclaim, or the relationship between subclaim and main claim
 - use the Toulmin model: claim, support, warrant (assumption, principle, value)
- find a way to argue against the support, the warrant, or the way they supposedly add up to prove the claim

Writer

- answer the criticism or argument (backing for warrant, rebuttal, qualifier)
- incorporate your response into your plan/outline for your paper
